

N. Niharika Bharadwaj

Computer Science and Engineering (Data Science) Student

+91-7899980436 - niharikabharadwaj055@gmail.com - GitHub

Education

Bachelor of Engineering in Computer Science and Engineering (Data Science)

Ballari Institute of Technology and Management (BITM), Ballari, Karnataka

vasishta pu college

Dream World School, Karnataka

CGPA: 9.38/10

2025 - Present

88%

2010 - 2023

Technical Skills

Programming Languages

C, Java, Python, SQL

Data Structures & Algorithms

Arrays, Strings, Linked Lists, Stacks, Queues, Searching, Sorting, Recursion

Documentation Skills

LaTeX, Overleaf

Projects

AI-Based Government Scheme Recommendation System | Python, Flask, Supabase, AI

- Developed a web platform to help users discover government schemes based on their eligibility and requirements.
- Built the backend using Flask and integrated Supabase for storing and retrieving scheme information.
- Designed an AI-assisted conversational interface for interacting with government-scheme information.
- Planned multilingual support to improve accessibility for users from different linguistic backgrounds.

Smart Car Allotment System | Arduino, C/C++, IR Sensors, Servo, I2C LCD

- Built an automated parking-slot allocation prototype using Arduino and IR sensors.
- Implemented vehicle detection, parking-slot allocation, availability display, and servo-controlled entry/exit.
- Designed the system for local operation without requiring IoT connectivity.

Blood Donation Management System | Python, Flask, SQLite, HTML, CSS, JavaScript

- Developed a web application for managing blood donors and blood-request information.
- Implemented backend functionality using Flask and database operations using SQLite.
- Designed interfaces for donor registration, blood-group-based search, and request management.

Certifications

- [AI Fundamentals workshop] - [BITM], [2026]
- [Drone buildin workshop] - [BITM], [2026]

Achievements & Activities

- Participated in academic hackathons and project-based technical competitions.
- Worked on Smart India Hackathon-oriented projects involving AI, web development, and public-service applications.
- Actively developing skills in Data Structures and Algorithms, Java, Python, Artificial Intelligence, and Software Development.
